

One Guiding Principle:

Learning Begins with Hearing

For students to fully understand in class, they have to be able to hear the lesson clearly. Providing classrooms with distributed sound solutions allows teachers to speak in a natural voice and helps students hear the lesson from anywhere in the room. Thousands of students and teachers are seeing the benefits of Classroom Audio Systems nationwide with:

- Crystal-clear audio throughout the classroom
- Enhanced student and teacher interactions
- Increased student engagement
- Decreased teacher vocal fatigue

Benefits of a Classroom Audio System

Audio Enhancement, Inc. was founded with the belief that learning begins with hearing. That's why classroom audio is at the core of everything we do. Research demonstrates that adding a sound system to a classroom can impact learning and improve test scores by 7-10%.* Each Classroom Audio System delivers the teacher's natural voice and multimedia audio to every student in the room at an enhanced, soothing volume. Our flexible Classroom Audio Systems can be used in any learning environment.

TEACHERS

- Reduced vocal strain
- Fewer repeated instructions
- Can speak in natural tone
- Decreased absenteeism

"We use the microphones to make sure everybody is getting the most out of every lesson possible, because students can hear every conversation."

- Ms. Sarah Cooper, a teacher from Hamblin County Schools in Tennessee

STUDENTS

- Increased engagement in the learning process
- Improved focus in the classroom
- Increased comprehension of lesson material
- Improved grades and test scores

"Students that were apprehensive to participate in the past are more inclined to share their thoughts or read aloud... Overall, this is a wonderful resource that should be used throughout all classrooms!"

- Ms. Christine M. Rosario, a teacher from Miami-Dade County Public Schools

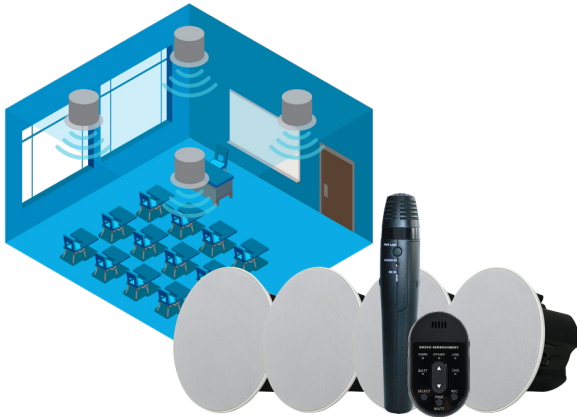

ADMINISTRATORS

- SAT and State test gains
- Reduced discipline referrals
- Reduced teacher absenteeism
- Increased teacher satisfaction

"The sound system is just amazing! I am already feeling the effects of not having to speak any louder than a normal talking voice when I teach and my students feel like I am always within range. Their attention has increased tenfold."

- Kim Edwards, teacher from Mark West Union School District in California

Audio Product Highlights

Classroom Audio Systems provide distributed audio to ensure the teacher's voice is heard above the typical level of classroom noise and help students hear the lesson from anywhere in the classroom.

BEAM is a Bluetooth® speaker with an integrated amplifier/receiver designed for use with interactive displays. BEAM can be expanded by installing additional speakers.

The **Mic360™** encourages students to actively participate in classroom discussions while ensuring that every student can be heard. Works with Audio Enhancement's XD Teacher Microphone.

The **XDSolo™** is a completely portable, wireless sound system using the XD Teacher Mic. Utilize the XDSolo in gym classes, large assemblies, and other teaching areas to get the best audio.

"If you really want to level the playing field for every child, then Audio Enhancement is a necessity for every classroom. The technology that Audio Enhancement provides is a major requirement that plays a key role in the success of our students and our school."

- Ron Clark, Founder of Ron Clark Academy, Atlanta, GA

Teacher Microphone

The **XD Teacher Microphone** is a convenient, high-quality microphone that disperses the teacher's voice evenly across the classroom. It is a perfect option for reaching every student in any educational environment, including large spaces, classrooms with windows, libraries, and gymnasiums

XD Handheld and Teacher Microphones

- Lightweight, simple to use, easy to setup and pair
- Equipped with lithium-ion batteries that last 10 hours
- Come with a standard micro USB charger and dual USB wall adapter

Handheld Microphone

The **XD Handheld Microphone** engages students in class discussions and makes their voices heard throughout the room. Students that use the handheld microphone speak more confidently and thoughtfully.

Founder Claudia Anderson created the first Classroom Audio System for her two hearing impaired children, but it soon became clear how the entire classroom could benefit from audio systems. She founded Audio Enhancement in 1978, and it is led by her four children today.
